MobiLift®

BX & BXB MOBILE LIFT TABLES

Bishamon®

Bishamon MobiLift™ scissor lift tables are rugged industrial lift tables with push-bars and casters. BX Series lift tables provide improved ergonomics by placing the load at a convenient work height while providing the mobility to locate the lift where it is needed.

MobiLift™ tables are available in various capacities and travels to satisfy a wide variety of applications. The manual foot-pump models have an integrated hydraulic pump/cylinder assembly while a 24-volt DC power unit provides the lifting power on electric battery powered models.

The MobiLift™ scissor lift tables add the value of mobility to the hydraulic lift table concept. Exceptional functionality and maneuverability is apparent, whether loaded or empty. In addition, rugged construction and premium-quality hydraulics complement their ease of use with low maintenance.

The MobiLift™ design allows workers to easily move and position loads to a convenient working height. By minimizing undesirable lifting, reaching and stretching, MobiLifts increase productivity and decrease workplace injuries.

MobiLift™ tables are used in a wide variety of applications. From stocking shelves in retail stores to lifting and moving materials in libraries, nurseries, machine shops and manufacturing operations, MobiLifts improve productivity.
